

## **Manor Oaks Community Uses CCTV to Stop Vandalism**

*March, 2015*

Digital Video Solutions, Inc. (DVS) is pleased to announce that Manor Oaks Neighborhood Association, a 400 member homeowners association based in Brookeville, Maryland, has decided to use a CCTV solution provided by DVS to secure its community pool facility. Soon after installation, Manor Oaks used the DVS system to successfully prosecute and seek restitution from a group of young adults who had vandalized the pool.

According to Property Manager Ravi Parkhie of The Management Group Associates, "Even though the incident occurred in the middle of the night, the DVS system was still able to produce crystal clear images that were fully court admissible. The system we replaced was a basic do-it-yourself system from Costco. The performance difference between the two is like night and day. For instance, with the previous system vandals were able to easily disable the system by knocking the cameras down. DVS used vandal-proof cameras mounted directly on our bricks, so it is very difficult for the vandals to keep the system from doing its job."

### **About DVS**

DVS is a national provider of security systems integration with expertise in video surveillance and access control. Core DVS offerings include:

- iCCTV hosted video surveillance
- iDoor™ hosted access control
- StoreAudit™ remote video audits

In addition, DVS provides traditional design, installation, and support for physical security systems.
