

Natelli Communities Selects iCCTV™ for Video Surveillance

June, 2014

Digital Video Solutions, Inc. (DVS) is pleased to announce that Natelli Communities, a residential land developer based in Gaithersburg, Maryland, has decided to secure its headquarters location using DVS' iCCTV cloud-based video surveillance service. The iCCTV service allows Natelli to store its entire video archive in a secure, off-site location while providing Natelli with global access to live and recorded video through the iCCTV web portal.

"We decided a while ago to use cloud computing as much as possible for our core IT requirements, and iCCTV lets us employ the same strategy for our general security needs," says Natelli CFO, Bill Moore. Moore continues, "I was impressed with how simple it was to set up our cameras for the iCCTV service, and I have been very pleased with how easy the web portal is to learn and use. The support and training offered by DVS to get us up and running was great!"

About DVS

DVS is a national provider of security systems integration with expertise in video surveillance and access control. Core DVS offerings include:

- iCCTV hosted video surveillance
- iDoor™ hosted access control
- StoreAudit™ remote video audits

In addition, DVS provides traditional design, installation, and support for physical security systems.
